

Petra SAE 75W-80 Synthetic Gear Oil

PN 88032 (32oz) Specification Sheet

Product Description:

Petra Synthetic 75W-80 is a fully synthetic gear lubricant designed specifically for manual transmissions, transaxles and transfer cases. It is a fully synthetic API GL-4 gear lubricant blended to SAE 75W-80. It provides exceptional thermal stability along with outstanding extreme pressure characteristics, shear stability and low temperature fluidity. This lubricant is well suited as “service fill” product for manual transmissions.

Advantages & Uses:

- API Service GL- 4 & MT-1
- Suitable for manual transmissions, transaxle and transfer cases
- Recommended for long drain, severe service manual transmission fluid capable of extending drain intervals
- Useful for all domestic and foreign vehicles where ATF or GL-4 gear oils are specified as “service” fill for manual transmission

Features:

- Exceptional low temperatures fluidity
- EP additives for load & wear protection
- Outstanding thermally stable at extreme temperatures and operating conditions
- Excellent shear stability
- Excellent corrosive and foam resistant
- Superior seals compatibility
